

American Community Survey Program Updates

New York SDC Affiliate Meeting

October 30, 2024

Nicole Scanniello
Assistant Division Chief for Communications
American Community Survey Office

The American Community Survey

Outline

- ACS Overview
- Changes for the 2024 ACS
- Potential Changes for the 2025 ACS and Beyond
- Margins of Error and Statistical Testing
- New Data User Resources
- Questions

The American Community Survey

The Foundation

- The American Community Survey (ACS) is the premier source of detailed information about the nation's people and housing.
- Surveys **3.5 million** addresses to produce annual social, economic, housing, and demographic estimates for communities throughout the U.S. and Puerto Rico
- Covers **40+ topics** — Collects detailed information previously collected by the decennial census each decade
- Helps inform how trillions of dollars in federal funds are distributed each year, supports over **300** evidence-based federal government uses
- Data released the year after collection as 1-year and 5-year estimates
- Officially started in 2005 (1-year estimates = 2005; 5-year 2005-2009)

The top screenshot shows the 'Welcome! Start here to respond:' section. It includes a 'Respond on esaoatd!' link, a 'User ID' field, and a 'Log In' button. A 'Can't find the User ID?' section provides instructions on how to find the 10-digit code above the address and to the right of the page. An example User ID is shown as '0000-0000'.

The bottom screenshot shows the 'Start Here' section. It includes instructions on how to respond (online or by mail) and a 'Your response is required by law.' section. It also includes a 'Please print the name and telephone number of the person who is filling out this form.' section with fields for Last Name, First Name, MI, Area Code, and Number. A 'How many people are living or staying at this address?' section includes instructions on who to include and exclude, and a 'Number of people' field. A 'Fill out pages 2-7 for everyone, including yourself, who is living or staying at this address for more than 2 months. Then complete the rest of the form.' section is also present.

The American Community Survey

2023 ACS Data Release Schedule

2023 ACS 1-Year Release

Data Products	Release
1-Year Estimates Public Release	September 12, 2024
1-Year Public Use Microdata Sample (PUMS)	October 17, 2024
1-Year Supplemental Estimates	October 17, 2024
119th Congressional Districts (Data Profiles)	January 7, 2025

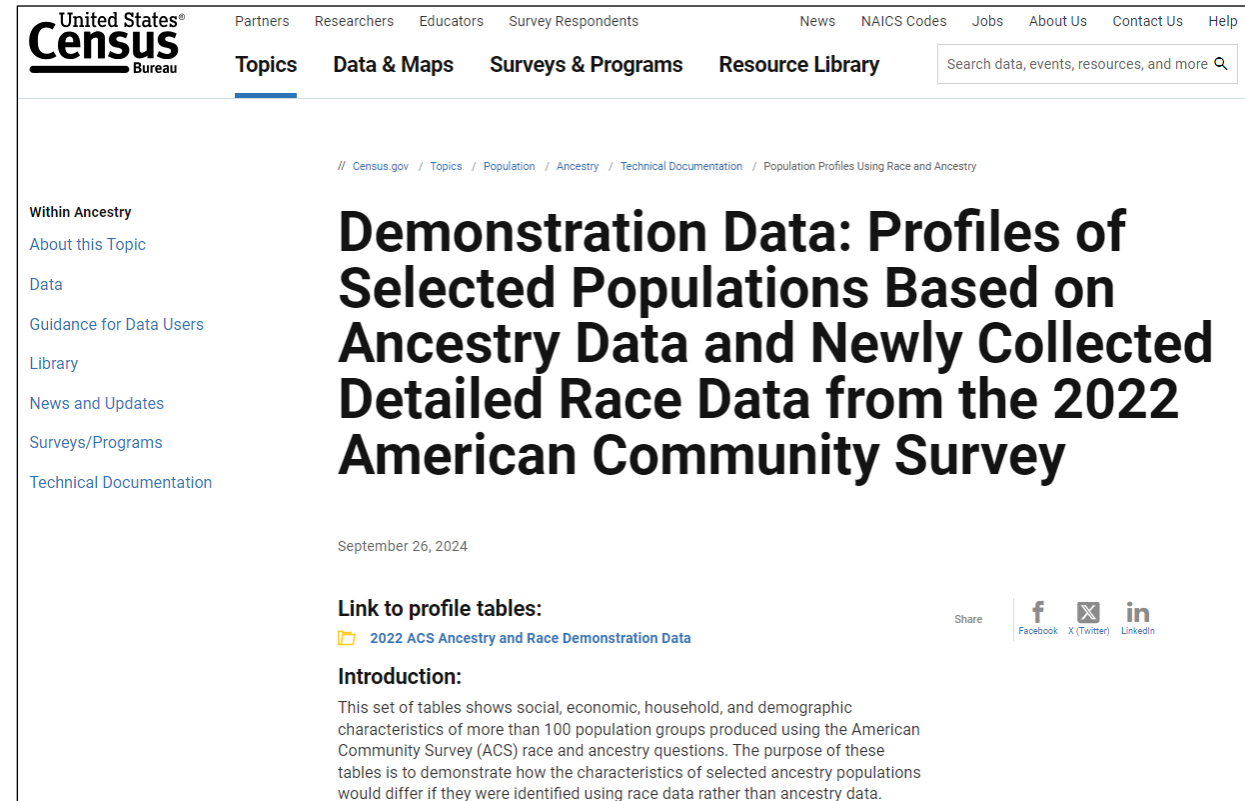

2019-2023 ACS 5-Year Release

Data Products	Release
5-Year Estimates Public Release	December 12, 2024
5-Year Public Use Microdata Sample (PUMS)	January 23, 2025
5-Year Variance Replicate Estimates	January 23, 2025

The American Community Survey

Ancestry and Race Demonstration Data Tables

- **Purpose:** Demonstrate how characteristics of ancestry populations would differ if identified using race data rather than ancestry data
- **Geographic Levels:** Nation, 50 states, District of Columbia, and Puerto Rico (53 Tables)
- **Groups Included:** 111 ancestry groups in each table
- **Product Layout:** Selected Population Profiles (S0201) with populations identified by the race and ancestry data side-by-side
- **Data Source:** 2022 ACS 1-year Microdata

The screenshot shows the United States Census Bureau website. The main navigation bar includes links for Partners, Researchers, Educators, Survey Respondents, News, NAICS Codes, Jobs, About Us, Contact Us, and Help. Below this is a search bar and a secondary navigation bar with Topics, Data & Maps, Surveys & Programs, and Resource Library. The breadcrumb trail reads: // Census.gov / Topics / Population / Ancestry / Technical Documentation / Population Profiles Using Race and Ancestry. The left sidebar contains a 'Within Ancestry' section with links for About this Topic, Data, Guidance for Data Users, Library, News and Updates, Surveys/Programs, and Technical Documentation. The main content area features the title 'Demonstration Data: Profiles of Selected Populations Based on Ancestry Data and Newly Collected Detailed Race Data from the 2022 American Community Survey' dated September 26, 2024. It includes a 'Link to profile tables:' section with a link to '2022 ACS Ancestry and Race Demonstration Data' and social media sharing options for Facebook, X (Twitter), and LinkedIn. An 'Introduction:' section follows, stating that the tables show social, economic, household, and demographic characteristics of more than 100 population groups produced using the American Community Survey (ACS) race and ancestry questions, with the purpose of demonstrating how characteristics would differ if identified using race data rather than ancestry data.

The American Community Survey

Content Changes for the 2024 ACS

Updated wording for 4 questions:

- **Condo Fees** — Now includes homeowners association (HOA) fees
- **Home Heating Fuel** — Updated wording for natural gas and bottled gas categories
- **Journey-to-Work** — Updated Taxi category to include ride-sharing as a mode of transportation
- **Veterans Period of Service** — Adjusted date ranges and names for several periods of service

census.gov/programs-surveys/acs/about/forms-and-instructions.html

The American Community Survey

Changes to the Condominium Fees Question

2023 Question

16 Is this house, apartment, or mobile home part of a condominium?

Yes → **What is the monthly condominium fee?** For renters, answer only if you pay the condominium fee in addition to your rent; otherwise, mark the "None" box.

Monthly amount – Dollars

\$, .00

OR

None

No

2024 Question

16 Is this house, apartment, or mobile home part of a homeowners association or condominium?

Yes → **What is the required monthly homeowners association fee and/or condominium fee?** For renters, answer only if you pay the fee in addition to your rent; otherwise, mark the "None" box.

Monthly amount – Dollars

\$, .00

OR

None

No

The American Community Survey

Changes to the Home Heating Fuel Question

2023 Question

13 Which FUEL is used MOST for heating this house, apartment, or mobile home?

- Gas: from underground pipes serving the neighborhood
- Gas: bottled, tank, or LP
- Electricity
- Fuel oil, kerosene, etc.
- Coal or coke
- Wood
- Solar energy
- Other fuel
- No fuel used

2024 Question

13 Which FUEL is used MOST for heating this house, apartment, or mobile home?
Mark (X) one box for the fuel used most.

- Gas: Natural gas from underground pipes serving the neighborhood
- Gas: Bottled or tank (propane, butane, etc.)
- Electricity
- Fuel oil, kerosene, etc.
- Coal or coke
- Wood
- Solar energy
- Other fuel
- No fuel used

The American Community Survey

Changes to the Journey-to-Work Question

2023 Question

32 How did this person usually get to work **LAST WEEK?** Mark (X) **ONE** box for the method of transportation used for most of the distance.

<input type="checkbox"/> Car, truck, or van	<input type="checkbox"/> Taxicab
<input type="checkbox"/> Bus	<input type="checkbox"/> Motorcycle
<input type="checkbox"/> Subway or elevated rail	<input type="checkbox"/> Bicycle
<input type="checkbox"/> Long-distance train or commuter rail	<input type="checkbox"/> Walked
<input type="checkbox"/> Light rail, streetcar, or trolley	<input type="checkbox"/> Worked from home → <i>SKIP to question 40a</i>
<input type="checkbox"/> Ferryboat	<input type="checkbox"/> Other method

2024 Question

32 How did this person usually get to work **LAST WEEK?** Mark (X) **ONE** box for the method of transportation used for most of the distance.

<input type="checkbox"/> Car, truck, or van	<input type="checkbox"/> Taxi or ride-hailing services
<input type="checkbox"/> Bus	<input type="checkbox"/> Motorcycle
<input type="checkbox"/> Subway or elevated rail	<input type="checkbox"/> Bicycle
<input type="checkbox"/> Long-distance train or commuter rail	<input type="checkbox"/> Walked
<input type="checkbox"/> Light rail, streetcar, or trolley	<input type="checkbox"/> Worked from home → <i>SKIP to question 40a</i>
<input type="checkbox"/> Ferryboat	<input type="checkbox"/> Other method

The American Community Survey

Changes to the Veterans Period of Service Question

2023 Question

28 When did this person serve on active duty in the U.S. Armed Forces? Mark (X) a box for EACH period in which this person served, even if just for part of the period.

- September 2001 or later
- August 1990 to August 2001 (including Persian Gulf War)
- May 1975 to July 1990
- Vietnam era (August 1964 to April 1975)
- February 1955 to July 1964
- Korean War (July 1950 to January 1955)
- January 1947 to June 1950
- World War II (December 1941 to December 1946)
- November 1941 or earlier

2024 Question

28 When did this person serve on active duty in the U.S. Armed Forces? Mark (X) a box for EACH period in which this person served, even if just for part of the period.

- September 2001 or later (Post 9/11)
- August 1990 through August 2001 (including the Persian Gulf War)
- June 1975 through July 1990
- August 1964 through May 1975 (including the Vietnam War)
- February 1955 through July 1964
- June 1950 through January 1955 (including the Korean War)
- January 1947 through May 1950
- December 1941 through December 1946 (including World War II)
- November 1941 or earlier

The American Community Survey

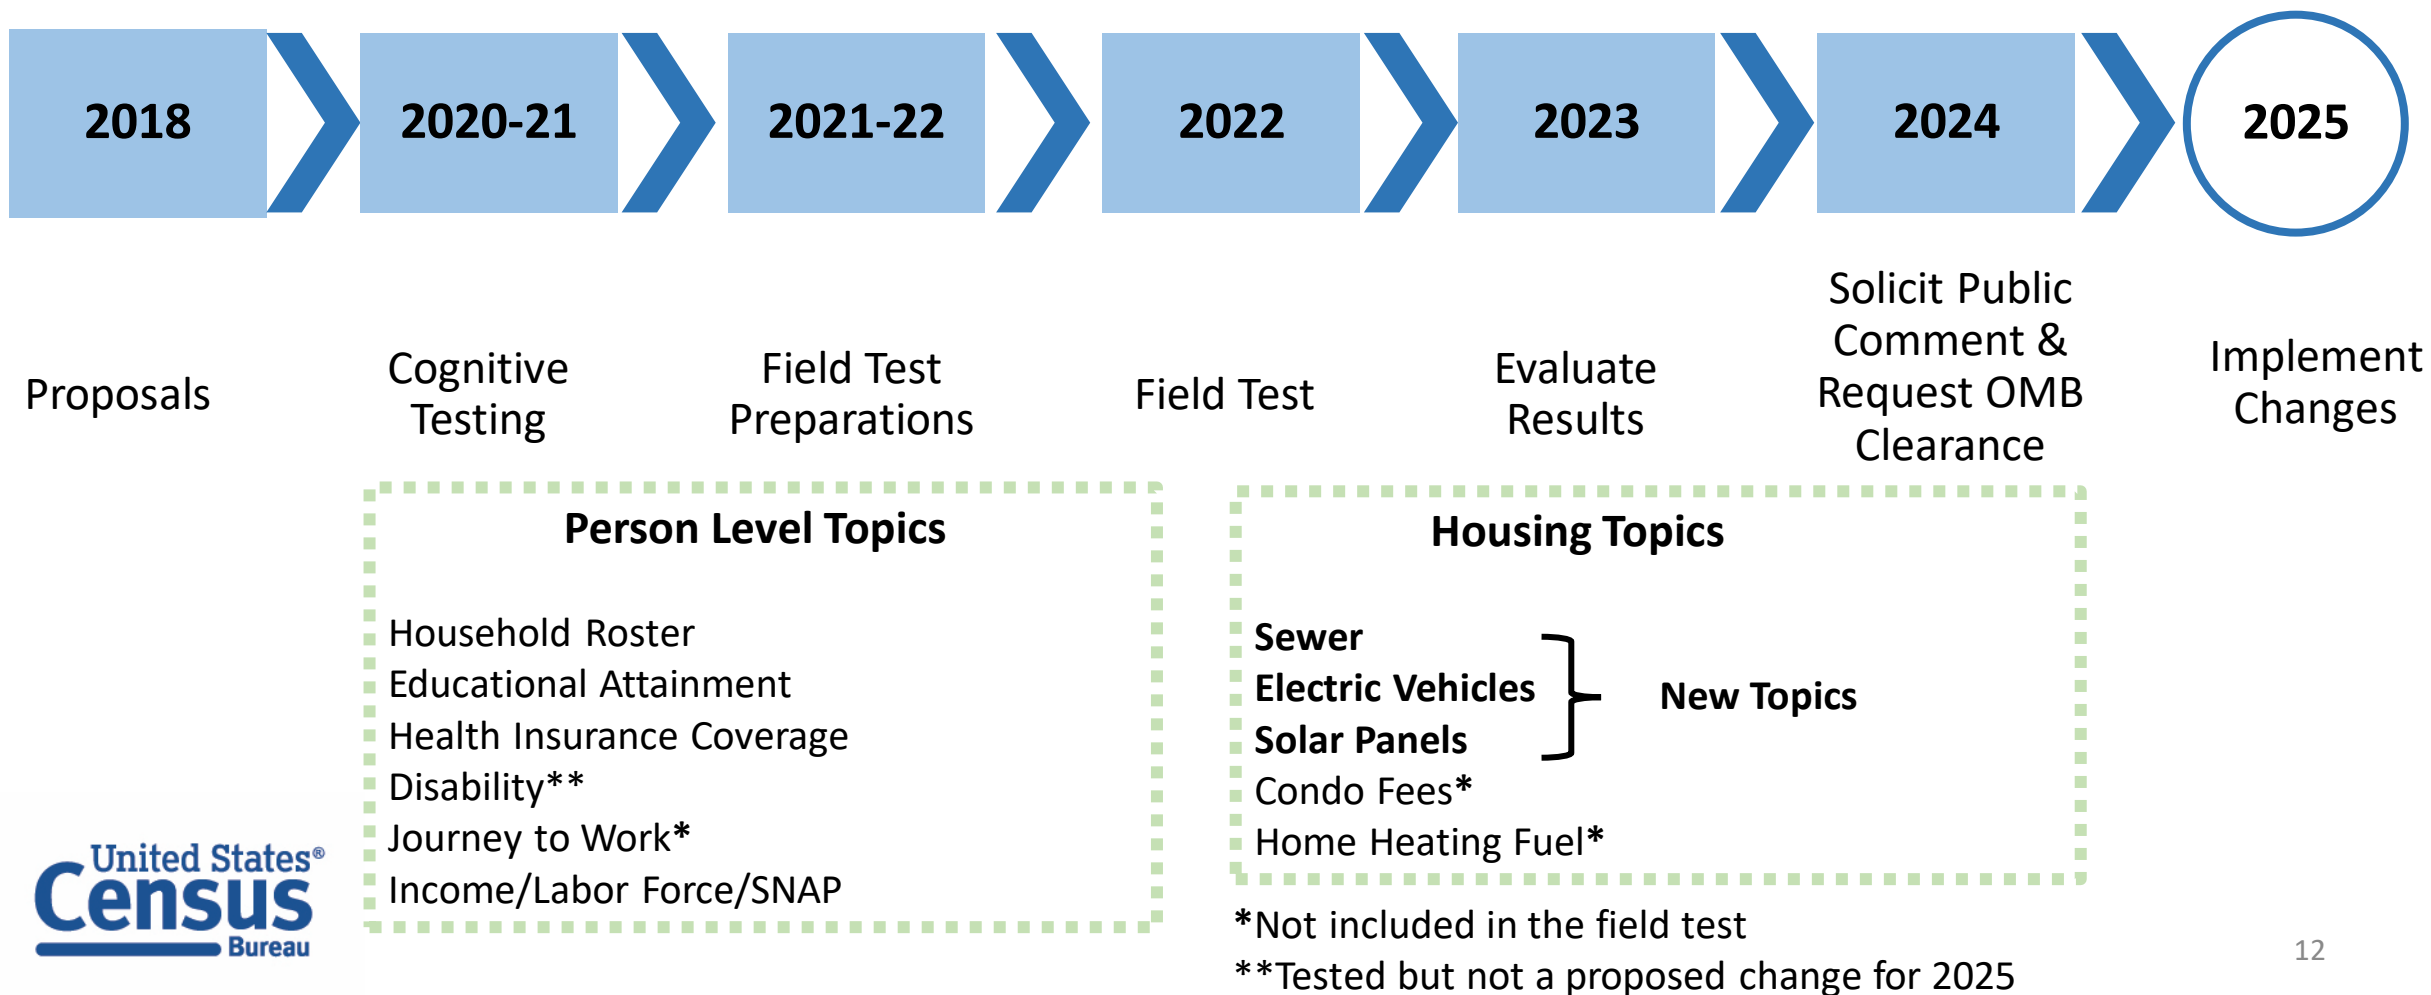

Data Collection Changes for the 2024 ACS

- **Internet data collection instrument available for select non-institutional group quarters**
 - e.g., college/university student housing, group homes, military barracks, etc.
- **Using administrative records for the acreage question**
 - Question still appears on the paper questionnaire
 - Question is skipped in Internet and nonresponse follow-up data collection instruments if we have an administrative record

The American Community Survey

Potential Question Changes — 2022 ACS Content Test

Content Tests are conducted approximately every five years to improve quality of existing questions or test the addition of new questions.

The American Community Survey

Potential Question Changes — Sexual Orientation and Gender Identity (SOGI) Research

The ACS received an FY23 appropriation of \$10 million to research adding questions about sexual orientation and gender identity (SOGI) to the survey

The ACS is testing:

- The feasibility of collecting SOGI information when someone provides data for someone else (i.e., proxy reporting)
- Alternative wording for the questions, placement of the questions on the survey, and response categories

The ACS SOGI test has two components:

- A self-response test of questions in the field and cognitive testing of Spanish translations of the SOGI questions
- Cognitive testing of questions began this year and reports are due by the end of 2024
- The field test began this summer and is expected to end in late 2024

The American Community Survey

Changes to the Race Standards

- On March 28, 2024, the U.S. Office of Management and Budget (OMB) published the results of its review of Statistical Policy Directive No. 15 (SPD 15) and issued updated standards for maintaining, collecting and presenting race/ethnicity data across federal agencies
- The revisions, the first since 1997, will improve the way race and ethnicity data are collected
- The updates:
 - Use one combined question for race and ethnicity, encouraging respondents to select as many options as applicable
 - Add Middle Eastern or North African as a new minimum category, separate and distinct from the White category
 - Require the collection of detailed data on race and ethnicity beyond the minimum race and ethnicity categories, unless an agency requests an exemption
 - Updated definitions, terminology, and guidance to agencies on the collection and presentation of data
- The Census Bureau is reviewing the updated SPD 15 and discussing them within our program areas. We will keep the public informed as we develop plans to implement the changes in our censuses and surveys

The American Community Survey

Comparing ACS Data Over Time

Things to keep in mind when comparing ACS data over time

- Changes in:
 - Geographic boundaries
 - ACS Tables
 - ACS Questions
- Compare similar period lengths (i.e., 1-year to 1-year and 5-year to 5-year)
 - Do not compare estimates from different period lengths (i.e., 1-year to 5-year)
 - Compare non-overlapping 5-year periods (e.g., 2013-2017 ACS 5-year vs 2018-2022 ACS 5-year)
- Use the margins of error and conduct statistical testing when making comparisons between estimates

[census.gov/programs-surveys/acs/guidance/comparing-acs-data.html](https://www.census.gov/programs-surveys/acs/guidance/comparing-acs-data.html)

[census.gov/programs-surveys/acs/news/data-releases.html](https://www.census.gov/programs-surveys/acs/news/data-releases.html)

American Community Survey Program

What is the Margin of Error (MOE)?

Definition: An MOE is a measure of the possible variation of the estimate around the population value

- At a given confidence level, the estimate and actual population value will differ by no more than the MOE
- 90% confidence level is the Census standard and ACS MOEs are provided in the same unit as the estimate
- Example:
 - Estimate of one-person households: 564,757 with an MOE of 10,127
 - Lower bound: $564,757 - 10,127 = 554,630$
 - Upper bound: $564,757 + 10,127 = 574,884$
- We can be 90 percent confident that the true number of one-person households falls somewhere between 554,630 and 574,884

American Community Survey Program

Statistical Testing Tool

Algebraically, the significance test can be expressed as follows:

$$\text{If } \left| \frac{\hat{X}_1 - \hat{X}_2}{\sqrt{SE_1^2 + SE_2^2}} \right| > Z_{CL}, \text{ then the difference}$$

between estimates \hat{X}_1 and \hat{X}_2 is statistically significant at the specified confidence level, CL

where \hat{X}_i is estimate i ($i=1,2$)

SE_i is the SE for the estimate i ($i=1,2$)

Z_{CL} is the critical value for the desired confidence level (=1.645 for 90 percent, 1.960 for 95 percent, 2.576 for 99 percent).

Statistical Testing Tool

Share

Comparing American Community Survey (ACS) estimates involves more than determining which statistic is higher or lower. Users should also conduct statistical testing to make sure differences are statistically significant and are unlikely to have occurred by chance. This testing takes into account the margin of error (MOE) associated with survey estimates, which are based on responses from a sample of the full population.

Looking for an easy way to conduct statistical testing? Try the Census Bureau's [Statistical Testing Tool](#). Simply copy or download ACS estimates and their MOEs into the spreadsheet to get instant results of statistical tests.

[Download Statistical Testing Tool \[2.4 MB\]](#)

Tool Features:

- Compares up to 3,230 pairs of estimates at once
- Compares multiple estimates simultaneously (up to 150 estimates)
- Displays statistical testing results ("Yes", "No") automatically
- Handles special formatting and characters, such as the '+' in front of the MOE, without additional editing by the data user
- Uses the Census Bureau's standard 90% confidence level, but can also process statistical testing at 95% or 99% confidence levels
- May be used to conduct statistical testing for other Census Bureau surveys

ACS Products and Tools That Aid With Comparisons

Comparison Profiles (CPs)

- Show ACS data side-by-side from different data releases, indicating where there is a statistically significant difference between estimates
- Include social, economic, housing and demographic characteristics
- 1-year CPs show data side-by-side for 5 years
 - Indicate statistically significant differences between the most current year compared to 4 prior years of data
 - Available for populations of 65,000 or more for most available geographic areas
- 5-year CPs show data side-by-side from two consecutive non-overlapping 5-year periods
 - Indicate statistically significant differences between the 2 periods
 - Available for the nation, states, counties, places, and metropolitan/micropolitan statistical areas with populations of 5,000 or more
- Available in data.census.gov and the API (CP02, CP03, CP04, CP05)

ACS Products and Tools That Aid With Comparisons (Cont'd)

Ranking Tables

- Provide state-level rankings on approximately 90 key ACS variables
- Include social, economic, housing and demographic characteristics
- Available for the Nation, states, District of Columbia, and Puerto Rico
- Available on the ACS website for ACS 1-year releases only

Geographic Comparison Tables

- Allow users to compare ACS data across geographic areas in the same table (e.g., all counties in a state)
- Available for states, metropolitan/micropolitan statistical areas, cities, counties, congressional districts, and several other geographic areas
- No statistical testing included
- Available on the ACS website
