

Fire Protection and Ambulance Services

The Public Employee Safety and Health (PESH) Bureau is committed to protecting the well-being of public employees by reducing injuries and hazards to fire and ambulance services staff. One of the ways we do this is by providing technical assistance and resources to fire departments and ambulance services throughout New York.

Do you need help developing PESH/ OSHA required programs? Are you able to meet all your training needs?

The PESH Bureau has developed model written programs to assist in the development and implementation of effective safety programs. PESH has trained safety and health professionals to help develop and provide training sessions to your staff. PESH also has professionals who offer train-the-trainer sessions. We have developed a CD with model programs and training modules for your use. However, if you prefer, PESH Safety and Health staff can personally provide these services. We will provide you with the CD you can use alone or we can support the CD with free consultation services.

Fire Protection and Ambulance Service CD contains:

Model Program and Employer Guides:
You can explore topics in a group setting, including:

- Confined Space Entry
