

# Highway, Street & Bridge Construction

The Public Employee Safety and Health (PESH) Bureau is committed to protecting the well-being of public employees by reducing injuries to Highway and Department of Public Works (DPW) staff. One of the ways we do this is by providing technical assistance and resources to Highway and Public Works Departments throughout New York State.

## Do you need help to provide effective safety training?

The PESH Bureau has developed training modules specifically designed for the hazards you encounter. We created these modules so you can conduct your own training. However, if you wish, a PESH Safety and Health professional can assist you. We will provide you with a CD that has all the necessary resources at no charge. (Contact local district PESH office for CD & assistance.)

## Highway/DPW PowerPoint Presentations:

- Lockout/Tagout
- Confined Space Entry
- Back Safety
- Lyme Disease, West Nile and Rabies
- Personal Protective Equipment
- Hazard Communication
- Flagging/Traffic Safety
- Trenching and Excavation

## Each module also contains:

**Tool Box session** - Provides a short refresher before the start of a project.

**Training records** - Ready for you to use.

**Model programs** - No need to develop your own.

**OSHA Standards** - Plain language explanation of the regulations.

**Sample Handouts** - Safety information to give your employees.

## On-Site Safety and Health Surveys

Safety professionals will conduct worksite assessments to identify hazards in your workplace and help you develop ways to control them. Industrial Hygienists will conduct health assessments and air or noise exposure monitoring.

## To take advantage of these services, contact your nearest PESH Office:
