**FOR IMMEDIATE RELEASE**

**March 24, 2022**

## **NYS Economy Added 39,800 Private Sector Jobs in February 2022**

*The Number of Private Sector Jobs in New York State Grew by 0.5% in February*

According to preliminary seasonally adjusted figures released today by the New York State Department of Labor, the number of private sector jobs in New York State increased over the month by 39,800, or 0.5%, to 7,888,300 in February 2022. By comparison, the number of private sector jobs in the U.S. increased by 0.5% in February 2022.

New York State's private sector jobs (not seasonally adjusted) increased by 458,000, or 6.3%, over the year in February 2022. By comparison, the number of private sector jobs in the U.S. increased by 5.4% over the year.

New York State's seasonally adjusted unemployment rate decreased from 5.3% to 4.9% in February 2022.

The number of private sector jobs in New York State is based on a payroll survey of 18,000 New York businesses conducted by the U.S. Department of Labor's Bureau of Labor Statistics (BLS). Monthly payroll employment estimates are preliminary and subject to revision as more complete data become available the following month. The BLS calculates New York State's unemployment rate based partly upon the results of the monthly Current Population Survey (CPS) of approximately 3,100 households in the State.

*Note: Seasonally adjusted data are used to provide the most valid month-to-month comparison. Non-seasonally adjusted data are valuable in year-to-year comparisons of the same month – for example, February 2021 versus February 2022.*

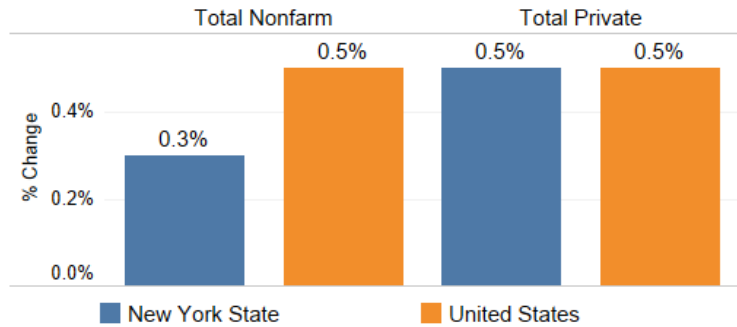

## Statewide Industry Employment

February 2022 – Seasonally Adjusted

- On a net basis, the total number of nonfarm jobs in the state increased by 30,600 over the month, while private sector jobs rose by 39,800, in February 2022.
- At the same time, the total number of nonfarm jobs in the nation increased by 678,000, while private sector jobs increased by 654,000.

# WE ARE YOUR DOL

## Statewide Unemployment

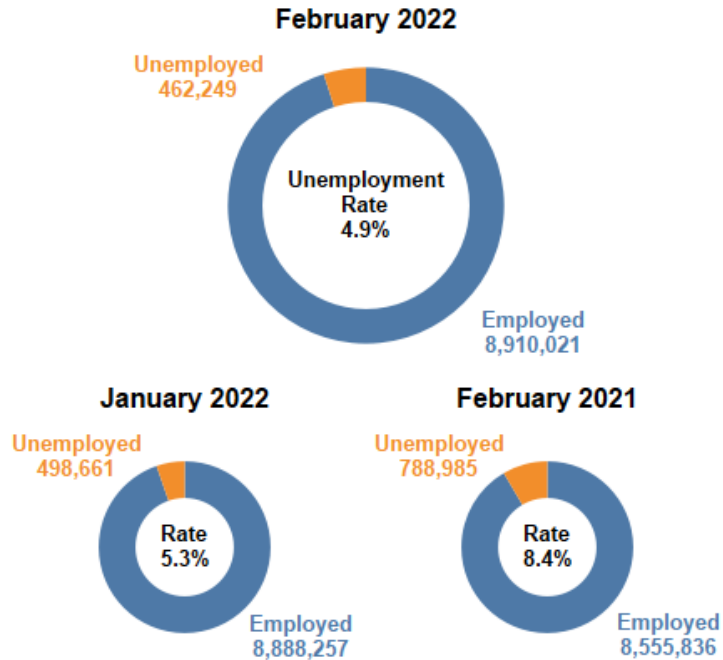

February 2022 – Seasonally Adjusted

- In February 2022, the statewide unemployment rate decreased from 5.3% to 4.9%.

### NYS Unemployment Rate Fell by 0.4 Percentage Points in February 2022

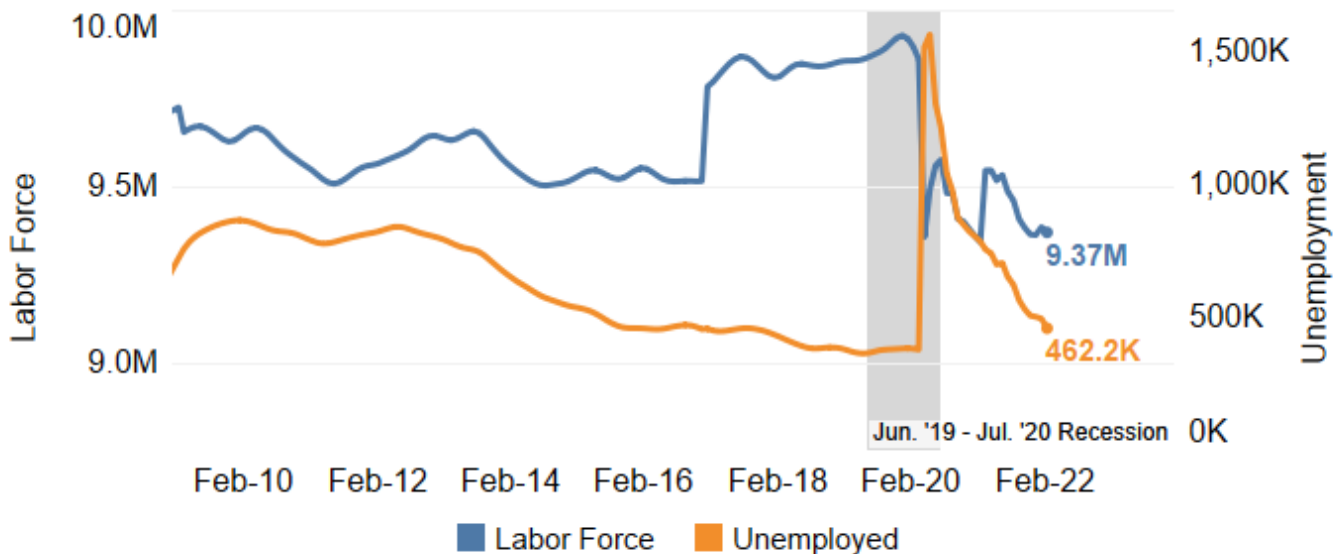

Labor Force Statistics, February 2021, January - February 2022

- New York City's unemployment rate decreased over the month from 7.6% to 7.0%. Outside of New York City, the unemployment rate decreased from 3.6% to 3.4%, reaching its lowest level on record (current records date back to 1976).
- The number of unemployed New Yorkers decreased over the month by 36,500, from 498,700 in January to 462,200 in February 2022.

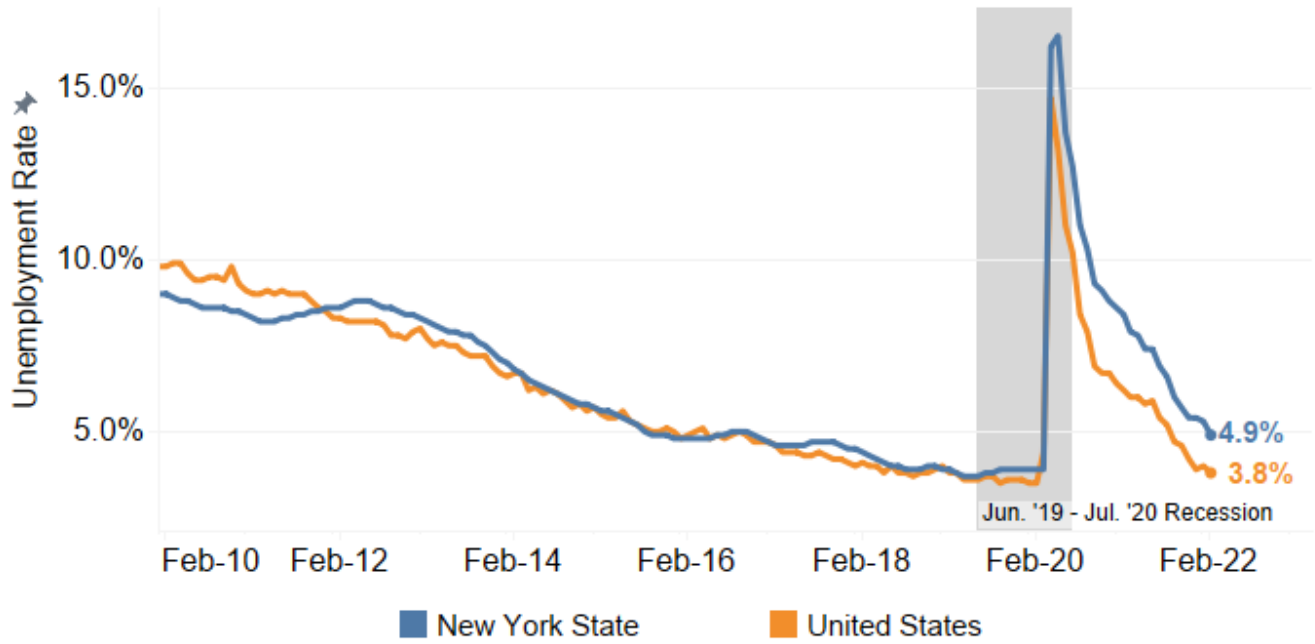

## The Labor Force and Number of Unemployed Fell in February 2022

Total Labor Force & Number of Unemployed, February 2010 - February 2022

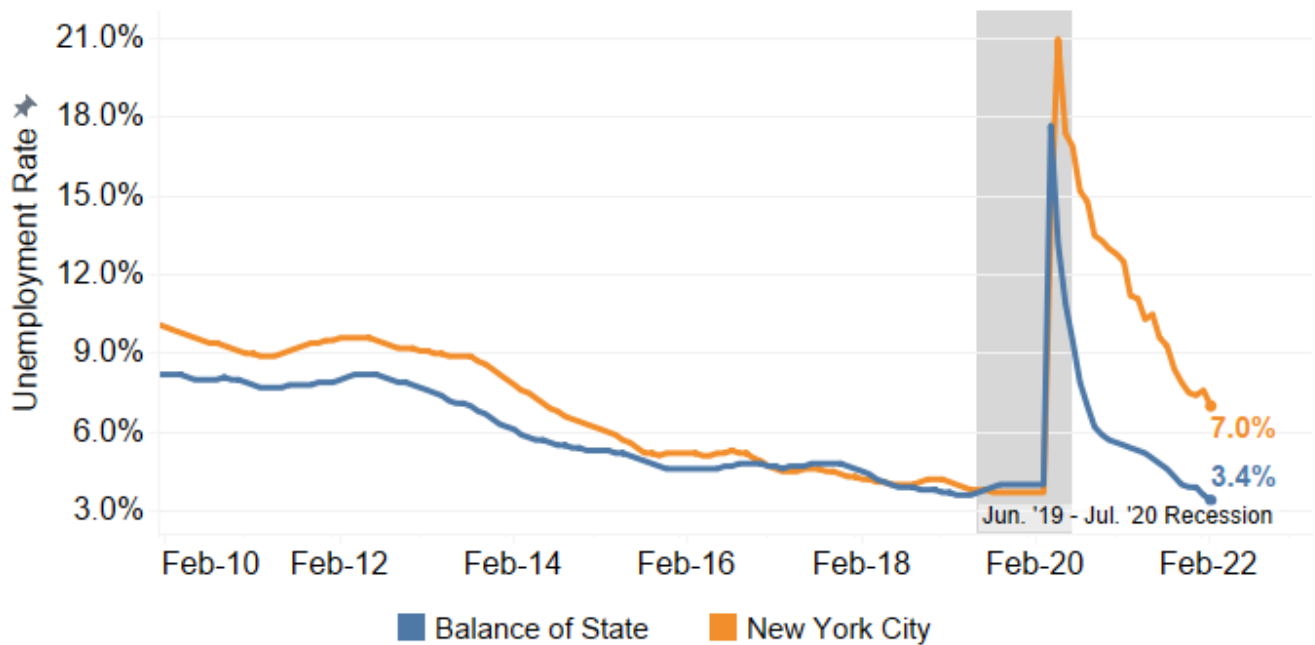

## NYS and US Unemployment Rate Decreased

Unemployment Rate, NYS & US, February 2010 - February 2022

## Unemployment Rate Fell in NYC and in Balance of State

Unemployment Rate, NYC & BOS, February 2010 - February 2022

## Substate and Industry Employment

February 2022 – *Not Seasonally Adjusted*

### New York State Exceeded Nation in Private Sector Job Growth

Over-the-Year Change in Total Nonfarm & Private Sector Jobs, February 2021 – February 2022

	Over-the-Year Change in Total Nonfarm Jobs		Over-the-Year Change in Total Private Sector Jobs	
	Net	%	Net	%
United States	6,838,000	4.8%	6,447,000	5.4%
New York State	487,700	5.6%	458,000	6.3%
Albany-Schenectady-Troy	14,200	3.3%	14,400	4.3%
Binghamton	3,300	3.6%	3,100	4.3%
Buffalo-Niagara Falls	17,500	3.5%	21,000	5.0%
Dutchess-Putnam	5,000	3.7%	4,800	4.4%
Elmira	900	2.7%	800	2.9%
Glens Falls	2,400	5.0%	2,500	6.5%
Ithaca	-400	-0.7%	0	0.0%
Kingston	3,500	6.4%	3,200	7.8%
Nassau-Suffolk	54,200	4.4%	48,500	4.7%
New York City	290,100	7.1%	283,600	8.1%
Orange-Rockland-Westchester	18,900	2.9%	24,000	4.3%
Rochester	18,900	3.8%	17,100	4.1%
Syracuse	8,900	3.0%	9,000	3.8%
Utica-Rome	3,700	3.2%	3,500	4.0%
Watertown-Fort Drum	1,700	4.5%	1,700	6.4%
Non-metro counties	11,300	2.4%	10,300	3.0%

*Note: The sum of sub-state area job estimates will usually differ from the New York State total. This is because the State total is calculated separately from the sub-state areas and is estimated based on an independent sample.*

## The Number of Leisure & Hospitality Jobs Increased by 34.4% Over the Year

Over-the-Year Change in Jobs by Major Industry Sector, February 2021 – February 2022

	Net	Percent
Leisure & Hospitality	199,100	34.4%
Trade, Transportation & Utilities	75,200	5.4%
Professional & Business Services	74,100	6.0%
Educational & Health Services*	30,900	1.5%
Government*	29,700	2.1%
Information	27,100	10.1%
Other Services	25,200	7.2%
Manufacturing	11,400	2.9%
Construction	8,700	2.5%
Financial Activities	5,800	0.8%
Natural Resources & Mining	500	11.1%

\*Educational and health services is in the private sector. Government includes public education and public health services.

*Note: The responsibility for the production of monthly estimates of state and metro area nonfarm employment by industry moved from the NYS Department of Labor’s Division of Research and Statistics to the U.S. Bureau of Labor Statistics (BLS), starting with the March 2011 estimates. More detailed information on the change is available on the [BLS web site](#).*

*Many economic data series have a seasonal pattern, which means they tend to occur at the same time each year (e.g., retail jobs usually increase in December). Seasonal adjustment is the process of removing seasonal effects from a data series. This is done to simplify the data so that they may be more easily interpreted and help to reveal true underlying trends. Seasonal adjustment permits comparisons of data from one month to data from any other month.*

*In New York State, payroll jobs data by industry come from a monthly survey of 18,000 business establishments conducted by the U.S. Bureau of Labor Statistics. Data are preliminary and subject to revision. Jobs data by industry do not include agricultural workers, the self-employed, unpaid family workers or domestic workers in private households.*

*Labor force statistics, including the unemployment rate, for New York and every other state are based on statistical regression models specified by the U. S. Bureau of Labor Statistics. The state’s unemployment rate is based partly upon the results of the Current Population Survey, which contacts approximately 3,100 households in New York each month.*

## New York State Labor Force Statistics

In February 2022:

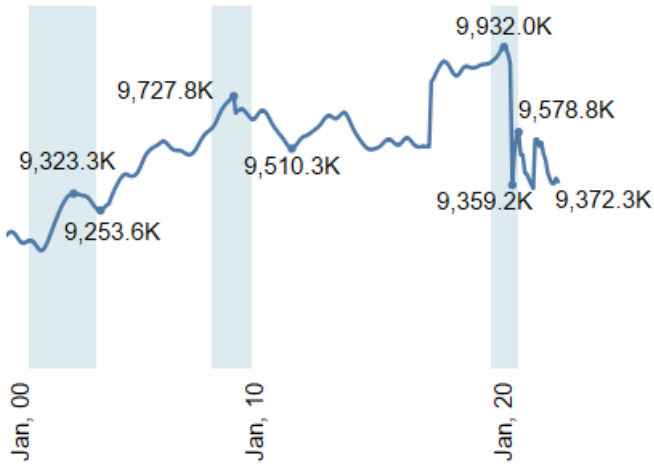

the unemployment rate decreased.

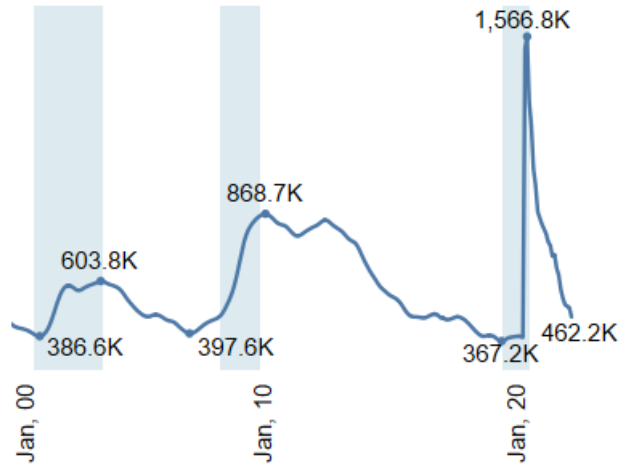

the labor force participation rate was unchanged.

the labor force decreased.

unemployment decreased.

Note: shaded areas represent New York State recessions.

## **Jobs and Unemployment Fact Sheet**

This fact sheet conveys important technical information that will contribute to a better understanding of labor force data (“household survey”), including resident employment/unemployment rates, and jobs by industry data (“business survey”), which are presented in the New York State Department of Labor’s monthly press release.

### **State Unemployment Rates Based on Regression Model**

Beginning with data for January 1996, unemployment rates for New York State and all other states (as well as New York City and the City of Los Angeles) have been estimated using time-series regression statistical models developed by the U.S. Bureau of Labor Statistics (BLS).

### **Advantage of Regression Model**

Use of a time-series regression model reduces the month-to-month variation in unemployment rates and resident employment by reducing variation caused by sampling errors and other components of statistical noise (irregularities).

### **Benchmarking of Estimates**

Once each year, labor force estimates, such as civilian labor force and the unemployment rate, are revised to reflect updated input data including new Census Bureau populations controls, newly revised establishment jobs data and new state-level annual average data from the Current Population Survey (CPS). As part of this procedure, all state figures are reviewed, revised as necessary and then re-estimated. This process is commonly referred to as “benchmarking.”

### **Changes in Methodology**

Labor force estimates are now produced with an improved time-series regression model, which utilizes “real-time” benchmarking. “Real-time” benchmarking reduces end-of-year revisions, which also means that major economic events will be reflected in a more timely manner in state labor force estimates.

In addition, the new methodology includes an updated way of estimating for sub-state areas (e.g. counties, metro areas) the number of unemployed who are new entrants or re-entrants into the labor force. This change in methodology will result in lower unemployment rates in some areas and increased rates in others.

### **Unemployed and UI Beneficiaries**

The estimate of the number of unemployed includes all persons who had no employment during the reference week (the week including the 12th of the month), were available for work, except for temporary illness, and had made specific efforts to find employment sometime during the 4-week period ending with the reference week. Unemployment insurance (UI) beneficiaries include those who apply for and qualify for UI benefits. Consequently, the estimate of the number of unemployed and the number of UI beneficiaries do not necessarily move in tandem.

### **Jobs Data**

Jobs data are obtained from a separate joint federal-state survey of business establishments. The survey, called the Current Employment Statistics of Establishments, has a sample size of 18,000 establishments in New York State. It excludes self-employed workers, agricultural workers, unpaid family workers and domestic workers employed by private households. This data represents a count of jobs by place of work. Data for each month is revised the following month as more complete information becomes available.
