

Enstriksyon konfigirasyon Multi-Factor Authentication (MFA)

Eta New York te kòmanse itilize Multi-Factor Authentication (MFA) nan kèk nan aplikasyon piblik li yo. MFA se yon fason pou ede asire sekirite kont ou. Sa mande pou yon dezyèm faktè anplis yon modpas pou pwouve ou se moun ou di ou ye a. Si w ap itilize yon aplikasyon ki pwoteje MFA, menm si yon moun ta devine oswa vòlè modpas ou, li toujou pa ta kapab konekte san dezyèm faktè w la. Piske yon modpas se yon bagay ou konnen, dezyèm faktè a se yon bagay ou ye (an jeneral se yon aparèy byometrik ki li l) oswa yon bagay ou genyen.

Konsèy: Li rekòmande pou w mete plis pase yon metòd Multi-Factor Authentication.
